TECHNICAL DATA SHEET

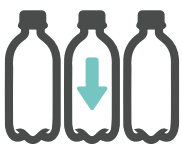

EW Bottling System

Our total water solution includes everything required to give you the best quality drinking water.

As the bottles are reusable and the water supply endless, this process can help to reduce water hospitality costs by up to 90%, making it far more efficient and cost effective than traditional methods. The system eliminates the need to buy in large quantities of branded bottled water, which can be expensive, and also difficult to store and chill in large numbers.

Multiple benefits

Our bottling systems offer a positive environmental alternative to transporting bottled water and also the high energy used to produce and dispose of all waste associated with plastic and glass bottle packaging. An Everything Water system offers the ideal solution, providing instant, purified, filtered and chilled tap water that never runs out.

Reduced storage

Fewer deliveries

Less glass waste

PREMIUM RANGE

UNDER SINK

Key features

- Sparkling (optional)
- Ice Bank Cooling System
- Cu= Safepath Biofilm Prevention
- Taps (optional)
- Drip tray (optional)

TABLETOP

Benefits

- Electric control (optional)
- Sparkling (optional)
- Ice Bank Cooling System
- Leakage safety valve
- Cu= Safepath Biofilm Prevention
- Quick-fit drip tray system (optional)

FREESTANDING

Benefits

- Electric control (optional)
- Sparkling (optional)
