TECHNICAL DATA SHEET

EW Volumising Eco-air Shower 8.0

Using water effectively is key to sustainable living. The Eco-air showerhead heralds a breakthrough in water efficiency, redefining shower performance as we know it.

The Eco-Air combines both water and energy efficiencies with an outstanding shower experience.

The technologically-advanced Venturi valve slows the water down, then speeds it up mixing air with water to maximise each water droplet size.

This delivers a much more refreshing shower with even lower running costs, so you can be cleaner, greener and better off too.

The showerhead has an attractive polished chrome finish which provides a fresh and elegant appearance, suitable for any bathroom. The showerhead is simple to install and compatible with most showers*. *Not suitable for instantaneous electric showers.

Key facts

| | |
|------------|-------------------|
| Dimensions | 250 x 40 x 110 mm |
| Colour | Chrome |
| Materials | ABS |

Warning

1. To avoid hot water dangers and conserve even more energy, make sure your water heater is set at 48°C (118°F) or below.
2. Test the shower water with your hand before bathing.
3. Always ensure the handheld shower head is properly placed in the bracket, to prevent the shower head from falling.
4. Do not pull on or tug the flexible hose. This may result in the shower head coming loose and falling.

SAVES 60% WATER • SAVES MONEY • SAVES ENERGY
